Assistant Commissioner for Patents
Washington, District of Columbia 20231

Dear Sir:

In response to the Office Action mailed April 22, 2002, please amend the above-referenced application as follows:

In the claims:

Please add new claims 109 to 128 as follows:

109. (New) A method of enabling user interaction with computer software running in a computer system via:

an interface surface containing information relating to the computer software and including coded data indicative of at least one interactive element relating to the computer software; and

a sensing device which: contains identifying data indicative of an identity of the user; and, when placed in an operative position relative to the interface surface, generates
